Anabel Villalobos

(760) 881-2253   villalobos1998@gmail.com   LinkedIn   Github

Skills
Python, Flask, JavaScript, Express, React.js, Redux.js, SQLAlchemy, Sequelize, PostgreSQL, Amazon Web Services(AWS), HTML5, CSS3, Sass, Git, Docker, Node.js, Heroku, Firebase

Projects

Personal Website (Javascript, Reactjs, CSS, HTML)   Live Site | Github
Full React Personal Website

EventToDo (Python, Javascript, Flask, React / Redux, HTML5, CSS, SQLAlchemy, PostgreSQL, Faker)   Live Site | Github
Where you can plan around work and other important priorities to be able to attend music events.
- Utilized setInterval function within React useEffect hook to build an image carousel background for login/sign up pages.
- Created custom error validations in the Flask backend and sent them forward using JSON format.
- Built a custom loading page animation with CSS keyframes, utilizing a setTimeout in a useEffect hook to manipulate page loading state in the App component.

Instaounce (Python, Javascript, Flask, React / Redux, HTML5, CSS, SQLAlchemy, PostgreSQL, Faker)   Live Site | Github
A clone of Instagram. Contributors: Myself, Jacob North, Wooyoung Kim, Wan-yi
- Implemented AWS3 to upload images while using Redux state reducer to immediately render the post in the user feed.
- Implemented HTML drag and drop feature when uploading images to manipulate image order.
- Integrated "Lorem Picsum" API and Faker to seed data for testing purposes.
- Built a user search bar using onChange in search input to change query useState variable, executing a function to filter users fetched from the database according to the query.

Camplife (JavaScript, Express, React / Redux, HTML5, CSS, Sequelize, PostgreSQL, Faker)   Live Site | Github
An application based off of HipCamp. Where you can host and book campsites.
- Utilized onClick functions to upload multiple images at a time when hosting a campsite.
- Utilized URL.createObjectURL() method to convert each local image file to storable data.
- Created a modal with multiple pages using React useState variables and React useContext.
- Used React Link built-in component to send review data as props to path location.

Experience

Cosmos Taverna, Bar Louie
Sports/Event/Restaurant Bartender   March 2018 - April 2022
- Learned how to work fast under pressure with a smile.
- Managed to keep up 31 plus people satisfied with service as a lone bartender.
- Trained and developed other bartenders in selling and bar techniques and procedures.

Homebridge, Remote
Closing Scheduler   June 2020 - August 2021
- Worked daily with Microsoft Excel and Outlook to log data and schedule loan closers/funders logically based on skill and time zone.
- Participated in daily meetings and communicated with a small team using Microsoft Teams.
- Trained and developed other schedulers.

Education

App Academy   August 2021 - May 2022
Immersive software development course with focus on full stack web development.
- Coded daily for 8+ hours and tested weekly to avoid deferral.
- Pair programmed daily and learned tons from many amazing programmers.
- Learned to be disciplined when it comes to time management
